

New Occurrence Reporting Regulation

Better protection
= broader **responsibilities**

Report it, for everyone's sake.

On 15 November 2015, the new Occurrence Reporting Regulation came into force in Europe. Under this new text, the reporter is better protected, but this comes with bigger responsibilities, including a broader list of events/mistakes that must be reported (e.g. fatigue, fume events, etc.). Check BeCA's webpage to know more about it: www.beca.be/occurrencereporting.
